

Color Check

- *Color quality inspection*
- *Color sequence inspection*
- *Inline product quality control*
- *Rejections reduction through process optimizing*
- *Fast integration in the production line (also in existing lines)*
- *Little room required*

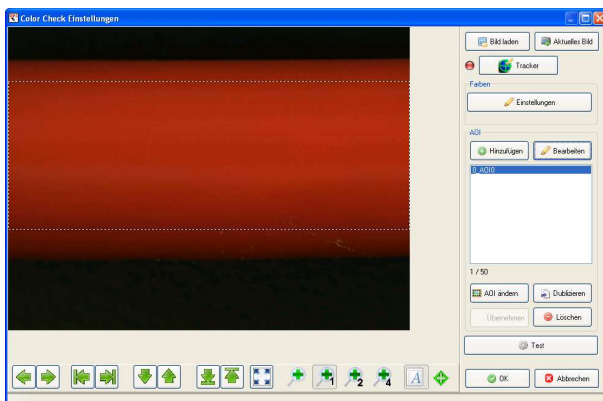

Color sequence check of multi stranded cables

The software module Color Check is many-sided applicable for different color inspection tasks like color quality check or color sequence check.

Example: allowed color nuances

Parameterization color quality of cables

*Example:
color sequence of multi stranded cables*

Verification of:

- Color quality in an allowed range of tolerance
- Color sequence in search areas

Application range

- Color inspection
- Extruder processes
- Color irregularities of attaching parts
- Color sequence of multi stranded cables

Features

- Economical high speed Vision System for 100% product check
- Choice between different color spaces: HSL, HSV, Lab and RGB
- Control of allowed color tolerances and accordingly color sequences and alarm function
- Simple parameterization of different products

keeping an eye on quality
